SGS Consumer Testing Services is a division of the SGS Group. With more than 59,000 employees serving as a consultative and quality assurance partner to fortune 500 corporate giants in over 1,000 international locations, SGS CTS is the recognized world leader in inspection, testing, certification and verification services. The company's comprehensive testing, product inspection, process assessment and technical services cover the entire supply chain from product development to retailing for soft line, hard line, electrical, wireless and food products. SGS' global network and expertise provide a single consolidated source that can help manufacturers, suppliers and retailers reduce risk, improve efficiency and product quality, and ensure compliance to both national and international standards.

Since 1878, we have set the benchmark for laboratory testing, product consultancy, process assessment, statistical product verification, and inspection and certification services. With leading clients from companies just like yours - manufacturers, importers, exporters, and consumer product retailers – no one knows your requirements better than SGS.

WHAT CAN YOU EXPECT FROM SGS AS YOUR QUALITY AND CONSULTING PARTNER? AS TECHNICAL EXPERTS, WE CAN DELIVER:

- Inspection: SGS inspects and verifies the quantity, weight and quality of all trade goods.
- Testing: SGS tests product quality and performance against regulatory and/or your standards.
- Certification: SGS certifies that products, systems, or services meet international and other global standards.
- Verification: SGS verifies that both products and manufacturing comply with global standards, local regulations and supplier/vendor compliance requirements.

WE PUT OUR EXTENSIVE EXPERIENCE TO WORK FOR LEADING BUSINESS AREAS, INCLUDING:

- Hardlines: hardware, building materials, automotive parts, housewares, fire safety technology, furniture, sporting goods, toys and more.
- Softlines: apparel, footwear, leather products, rubber/latex products, home textiles, functional fabrics and the like.
- Electrical and Electronics: luminaries, audio-video products, automotive products, household and industrial products, IT and telecommunications equipment and more.
- Food: raw, semi-manufactured, and final products including meat, seafood, dairy, fruits, vegetables, bread, beverages, and meals.
- Social Responsibility Solutions: compliant employment conditions, environmental management systems, supply chain security procedures and others.
- Product Sustainability: life cycle analysis, carbon footprinting, eco-efficient packaging, supplier transparency, eco-labeling, and customized eco-design solutions
